Organic Cotton

Same as standard cotton except organic cotton is grown without the use of synthetic fertilizers and other chemicals

Because organic cotton is grown entirely without chemicals, it reduces the harmful effects of pesticides and fertilizers used in traditional methods. Organic cotton farming renews the soil through crop rotation and by using manure fertilizer.

In order for organic cotton to be "certified," the land used to grow the cotton must be treated organically for 3 years and obtain a certificate from a governing agency.

- Biodegradable
- Hypoallergenic
- Machine washable and dryable
- Soft hand
- Absorbs moisture easily
- Easy to decorate
- All the same qualities as standard cotton

Red House 100% Organic Cotton Pique Polos: **RH31, RH32**

 Precious Cargo Infant 1-Piece: **CAR04ORG**
 Port Authority 100% Organic Grocery Tote: **B100ORG**

Rayon from Bamboo & Poly from Bamboo Charcoal

Made from bamboo

One of the world's most renewable plants, bamboo grows up to a foot a day without the use of chemical pesticides. When used to develop rayon from bamboo fabric, bamboo offers a soft hand and breathable wear.

Bamboo charcoal technology uses high heat to convert bamboo into charcoal—which is then made into a soft polyester fabric that naturally wicks moisture.

Rayon from Bamboo

- Soft hand
- Breathable

Poly from Bamboo Charcoal

- Soft hand
- Breathable
- Moisture wicking

Rayon from Bamboo

Port Authority Bamboo Sandwich Bill Cap: **C873**
 Port Authority Bamboo Towel: **TW56**

Poly from Bamboo Charcoal

Port Authority Bamboo Pique Sport Shirts: **K497, L497**
 Port Authority Bamboo Charcoal Birdseye Jacquard Sport Shirts: **K498, L498**

Recycled Polyester Blend

Made from post-consumer waste and fabric remnants

Our cap made with recycled polyester content lessens the need for oil, reduces waste and produces less pollution.

- Soft hand
- Breathable
- Wind resistant
- Rain resistant

Port Authority Recycled Poly Cap: **C875**

Modal

Extracted from beech tree wood pulp

Produced from indigenous beech wood. Beech trees are an easily renewable resource and require fewer pesticides and fertilizers to grow.

- Colorfast
- Fade resistant
- Anti-pill
- Shrink resistant
- Highly water absorbent
- Softness that easily surpasses mercerized cotton while preserving a slight loft

Port Authority Ladies Modal Soft Touch Shirts: **L487, L490**
