NKFZ2608 Nike Brasilia Camo Backpack

EMBROIDERY
Embroidery is the art of embellishing a piece of apparel with a needle and thread or yarn creating stunning visual representations of various types of art. This is achieved by converting logos in a digitizing software and using various stitch patterns, angles, density and stitch types to create depth, movement and detail. Thread can be made from many materials. The most commonly used threads are polyester and rayon. There are also options such as metallic, cotton, nylon, silk and even Nomex thread for fire resistance. Embroidery has a very high-perceived value and is popular for use on most apparel, bags, hats, luggage, blankets and more!

For best results, Magnetic or Clamp Frames are recommended for stability and max decoration range. Using performance woven backing on this fabric to avoid puckering is recommended.

SCREEN PRINTING
An imprinting method in which the image is transferred to the fabric. Ink is squeegeed through a stenciled screen stretched over a frame and then cured in a dryer.

Low-cure poly inks are required. For best results on a sublimated or camo pattern, use black bleed blocker under base. For best results, manual press or specialty equipment may be required.

HEAT TRANSFER
A graphic, name and or number applied to a textile with a heat press. Great for quantities of any size, sports name and numbering, fashion, performance wear, print on demand programs and on-site decorating events.

For best results on a sublimated or camo pattern, use low-cure black bleed blocker.
For best results when using heat applied consumables to avoid a color or sheen change, it is recommended to use a protective foam application pad.

It is a best practice to consult with your decorator or consumable supplier(s) for accessories, specialty frames and applications that are specific to a shop's setup and equipment.
